Precision Bending

Our Featured Part for May is an aluminum chassis with a feature that highlights our precision forming capabilities. On either side of the part is a hem bend to create the mounting flanges for a standard 19.2" wide rack mount system. The thru holes on the hem bends were added when the blank was laser cut. If you look at the close up detail picture, you will see that after forming the holes line up perfectly, no secondary drilling operation required.

Complete Assembly, Sheet Metal, Machined and Welded Components.

- > ISO 9001 certified quality management system
- > Certified Welding to MIL-STD-1595a for process DTAW Group 1b, 1ia
- > 100% in-process inspection
- > Certified inspection reports

All CAD Formats:

Solidworks (sldprt, sldasm),
 AutoCAD (dwg, dxf), Inventor,
 Pro/E, CATIA 4/5, Unigraphics,
 Parasolid, ACIS SAT, iges,
 step, ckd, prt, stl
