Ready In Two Easy Steps

Our Featured Part for the month of March was fabricated in our CNC machine shop. We started with a 2.5" diameter piece of 316L stainless steel round bar and used our CNC lathe to remove as much material as possible, bringing many of the features to their final dimensions, and leaving some others rough cut. But they didn't stay rough cut for long because the second operation was the final operation. Next the parts were loaded in our vertical CNC mill and had the final features machined. More efficiency was gained by our CNC operator creating a fixture to hold multiple parts at one time.

Complete Assembly, Sheet Metal, Machined and Welded Components.

- > ISO 9001 certified quality management system
- > Certified Welding to MIL-STD-1595a for process DTAW Group 1b, 1ia
- > 100% in-process inspection
- > Certified inspection reports

Did You Know?:

"Stewardesses" is the longest word that is typed with only the left hand.

The longest word that can be typed using only our right hand is "lollipop".

Problem:

The 5 inner triangles are identical. What is x?
