

Complete Assembly, Sheet Metal,
Machined and Welded Components.

- > Approved supplier to ISO 9001:2008 certified companies
- > Quality Assurance to MIL-i-45208a
- > Certified Welding to MIL-STD-1595a for process DTAW
- Group 1b, 1ia
- > 100% in-process inspection
- > Certified inspection reports

Machining and Welding In Harmony

The granulator stand shown here will eventually have a home on a pharmaceutical assembly line, and be used to break large chunks of medicines into finer powders so they can be pressed into tablets. To achieve the tolerances required for this part it must move back and forth between the machining and welding departments several times during the assembly process. A close look at this assembly will reveal some of the components and mounting points used for power transmission to turn the shaft that does the granulating.
