Part of the Month March

Not a Manhole Cover

Quiz:

On March 12, 2009, the U.S. House of Representatives passed a non-binding resolution making March 14 the observance day of what mathematical constant?

Problem:

A cylinder 15 cm high has a circumference of 4 cm. A string makes exactly 5 complete equally spaced turns around the cylinder from top to bottom. How long is the string in cm?

* Please be sure to check our website for answers to all previous months Problems and Quizzes! Go to www.metalwork.com and click on Problem of the Month link.

No, March's Part of the Month is not a manhole cover, but it is used in the water treatment industry. This part starts out as a 3/4" thick piece of 316 stainless steel that is 23" in diameter. Both sides are machined to add the various tapped holes and other machined features. We run this in our Hass VF3-YT Milling Machine which features an extended travel of 40" x 26" x 25" (X, Y, Z axis respectively). Large or small, we can machine it all, send your inquiries today!

Quote:

"It is the essence of genius to make use of the simplest ideas."
