

January

Part of the Month

...And A Happy New Year!

We are starting off 2015 with a relatively simple bracket featured as our Part of the Month. We frequently talk about using fixtures to locate parts for welding or machining, but sometimes we need to make a fixture to help form a part. Looking closely at this part you'll see that there is no feature parallel or perpendicular to the bend line. So in this case a fixture was created to precisely locate the part on our press brake for forming. After forming, the parts go through inspection and off to our satisfied customer.

- Problem:**
Which statement is true? Note: *Nothing is missing from the problem!*
- a) All of the following.
 - b) None of the following.
 - c) Some of the following.
 - d) All of the above.
 - e) None of the above.

Quiz:
On New Year's Day 1914, the world's first airline started operating within which American state?
